SBELL Synchronized Bell System

ETHERNET + POE

- Cost-effective, easy to install, easy to use break bell system for schools, offices, warehouses, factories or other commercial buildings in areas of low to medium ambient noise levels
- Built-in web-based software, program from any web browser with the IP address, no additional software or hardware needed, connects via CAT5.
- Time Synchronization Options: Ethernet and or GPS sync
- Acts as NTP server to sync computers, phones, clocks and other devices
- Customize: Bells, Sounders and Lights. POE (Power over Ethernet) options available.

Custom web-user interface

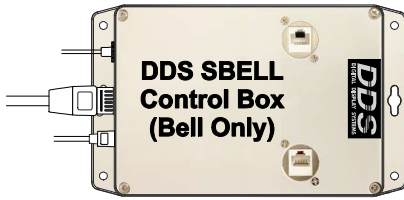

Up to 500 programmable events,
weekday/calendar based.

Create multiple types of event groups,
for different times of year.

Operate multiple bells and sounders
